Technical: Microsoft Excel (XLOOKUP, VLOOKUP, INDEX-MATCH, SUMIFS, PivotTables, Power Query, Charts), Power BI, SQL, R, Python (Foundational)

PROFESSIONAL EXPERIENCE

Primo Impex Pvt Ltd | Commercial and Business Operations

Jan 2025 - Sep 2025

- Managed financial and commercial tracking across 20+ customer and wholesale accounts, monitoring revenue, supplier costs, margins, accounts receivable and payable, and cash flow.
- Built and maintained Excel trackers consolidating sales, pricing, product economics, and account balances to support performance analysis and discrepancy resolution.
- Evaluated supplier terms, customer demand, channel pricing, and expected margins to inform purchasing, pricing, and account decisions.
- Reconciled account records and investigated pricing and financial discrepancies, coordinating follow-up with customers, suppliers, sales, purchasing, and operations.
- Redesigned online sales workflows across Amazon, the company website, and wholesale platforms, contributing to **130% growth in online sales over four months**.

Algoquant Fintech | Junior Analyst Intern, Commodity Markets

Jul 2024 - Dec 2024

- Cleaned, validated, and reconciled recurring market, pricing, financial, and macroeconomic datasets, investigating inconsistencies before analyst review.
- Analyzed commodity price movements, supply-demand developments, financial statements, and sector trends to identify drivers of market and company performance.
- Prepared analytical summaries, charts, and scenario observations, presenting research findings and supporting evidence to the supervising analyst.

EDUCATION & PROFESSIONAL DEVELOPMENT

York University, Toronto, ON | Bachelor of Arts, Business Economics | 2021-2026

AI Prompting and Optimization | Coursera

Structured prompting for research and analytical workflow optimization, including validation of AI-assisted outputs.

SELECTED PROJECTS

Independent Projects | 2026

FP&A Budgeting, Forecasting & Variance Analysis Model | Excel

- Built a driver-based, 12-month operating budget for a simulated wholesale and e-commerce business, linking sales volumes, pricing, cost of goods sold, operating expenses, and EBITDA.
- Developed monthly budget-versus-actual reporting and an updated full-year forecast, analyzing revenue and cost variances to explain changes in profitability.
- Modelled base, upside, and downside scenarios and prepared a management summary outlining performance drivers, forecast risks, and recommended actions.

Commercial Performance & Receivables Dashboard | SQL, Power BI

- Used SQL to clean, validate, and aggregate simulated sales, product, customer, and invoice data, reconciling reporting totals to source records.
- Built a Power BI dashboard tracking revenue, gross margin, product and customer contribution, and receivables aging by channel and reporting period.
- Analyzed pricing, sales mix, and overdue balances to identify margin improvement opportunities and collection priorities, presenting findings in a commercial performance report.

ADDITIONAL ACTIVITIES

York University Economics Club: Participated in investment competitions and portfolio simulations, contributing financial research, investment analysis, and team presentations.
